

FOLDING OUTSWING DOOR

**NOW THE DEFINITION OF
INSIDE OR OUTSIDE IS SIMPLY
YOUR POINT OF VIEW.**

Andersen® Folding Outswing Doors bring the outside in and the inside out.

Construction

The standard construction of the outswing folding patio door is an aluminum clad exterior with a rich wood interior. The aluminum cladding comes in 50 color options and has an AAMA 2605 finish on the panel and frame. There are seven standard wood species to choose from. A wood exterior panel and frame construction is also available as a special request product.

Design Criteria

To allow for proper performance and operation, verify the structural integrity of the header such that the maximum deflection with live and dead loads is limited to the lesser of $L/750$ of the span and $\frac{1}{4}$ ". The maximum weight per panel with Low-E4®, SmartSun™ or Sun glass is 200 lbs. per panel. Weights using alternate glazings will need to be provided by Andersen.

Features

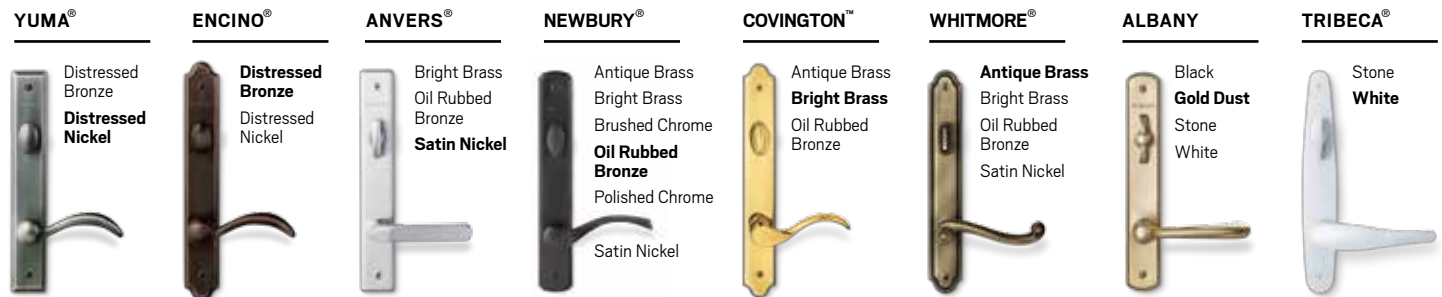

- Built to fit openings up to 48 feet wide by 10 feet tall
- Top hung system allows for easy operation
- High-performance Low-E4® glass means energy performance
- 50 Exterior aluminum clad colors* and seven wood species
